

WeRateDogs DAND Project

A Data-Wrangling project by Matthew Olushola Odebunmi

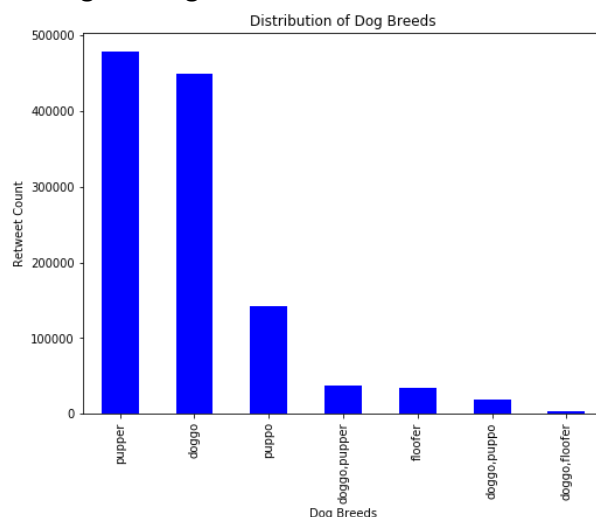

It is no gainsaying people love dog breed pupper name call "BO"

- "WeRateDogs is a Twitter account that rates people's dogs with a humorous comment about the dog. The account was started in 2015 by college student Matt Nelson, and has received international media attention both for its popularity and for the attention drawn to social media copyright law when it was suspended by Twitter for breaking these aforementioned laws." from wikipedia. As of August 2022, WeRateDogs have over 9.3Million following.

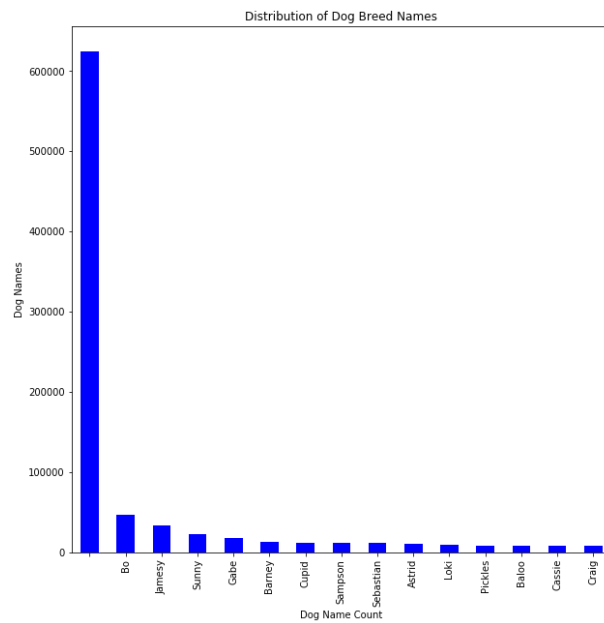

- The WeRateDogs Twitter archive contains basic tweet data for all 5000+ of their tweets, but not everything. One column the archive does contain though: each tweet's text, which I used to extract rating, dog name, and dog "stage" (i.e. doggo, floofer, pupper, and puppo) to make this Twitter archive "enhanced." Of the 5000+ tweets, I have filtered for tweets with ratings only (there are 2356). the data was gotten from Udacity as part of Data Analysis Nanodegree program

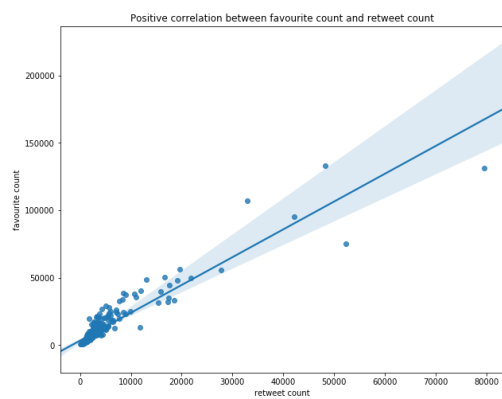

➤ The highest dog breed with retweet count

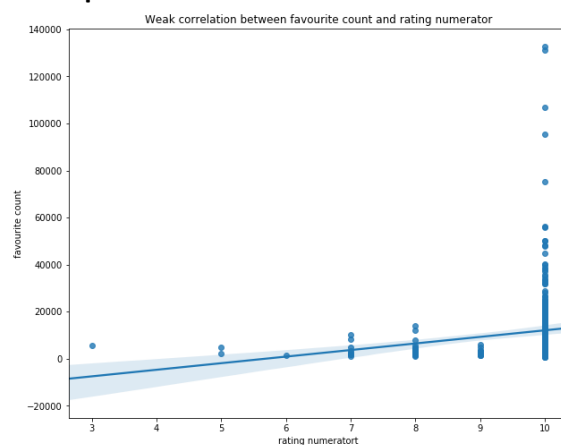

➤ **The highest dog breed name with retweet count**

➤ **Positive correlation between favourite count and retweet count**

➤ **Weak positive correlation between favourite count and rating numerator**

➤ **Weak positive correlation between retweet count and rating numerator**
